SUMMARY

I've spent 12 years building iOS apps, the last six on Portable North Pole, the App Store's #1 Santa app, with 6M users and a 4.8 rating. This past year I shipped Talk to Santa, a real-time voice experience on OpenAI's Realtime API, and built the RAG support agent that now answers users in-app across iOS, web, and Android.

EXPERIENCE

Senior iOS Developer, *UGroupMedia*

January 2020 - August 2026

Lead iOS for Portable North Pole (6M users, 4.8 rating), owning the Swift client plus the gRPC contracts and Python LLM services behind its newest features. Shipped Talk to Santa, a real-time voice experience on OpenAI's Realtime API, with per-conversation token and cost accounting. Built and hardened the in-app AI support agent (RAG pipeline, system-prompt engineering, LLM-as-judge evaluation) through iterative live-conversation audits and a model migration, now live across iOS, web, and Android. Migrated the app to Swift 6 strict concurrency and iOS 26, and the networking layer from grpc-swift v1 to v2. Drove a stability push across the render, orientation, and support-chat paths, fixing production crashes and raising iOS unit-test coverage from under 10% to over 70%. Built an automated video-regression harness (frame-level SSIM/PSNR diffing) to validate a major render-pipeline migration, and fixed crashes and memory leaks in the underlying FFmpeg/MLT engine. Engineered the subscription platform (multi-provider OAuth, passwordless auth, automatic purchase restoration) and auto-renewal retention flows, with privacy-compliant, GDPR-aligned analytics.

Senior Mobile Development Engineer, *IPPON Technologies*

September 2014 - August 2019

Designed, developed, and maintained mobile applications for diverse client portfolio ranging from showcase apps to complex social platforms. Led full-cycle mobile development including architecture design, implementation, testing, and deployment. Established mobile continuous integration platform ensuring code quality and automated deliverables. Contributed to business development through technical proposal preparation and client presentation for mobile projects. Mentored development teams and provided technical leadership across multiple concurrent projects.

CORE SKILLS

Languages: Swift 6, Objective-C

Other languages: Python, Kotlin, TypeScript

iOS / Apple: SwiftUI, UIKit, async/await, Combine, StoreKit 2, tvOS, Core Data

AI / LLM: OpenAI Realtime API, RAG, prompt engineering, LLM-as-judge eval, TTS

Backend / Platform: gRPC, Protobuf, OAuth, FFmpeg, Firebase, REST

Practices: CI/CD (Xcode Cloud, GitHub Actions), Fastlane, MVVM, Redux, Coordinator

Languages spoken: French (native), English (fluent)

SELECTED PROJECTS

Portable North Pole (PNP), UGroupMedia, iOS & tvOS

The App Store's #1 Santa app: personalized video and real-time AI experiences for 6M users, 4.8 rating.

Tech: Swift 6, SwiftUI, OpenAI Realtime API, RAG, LLM Eval, Python, async/await, Combine, FFmpeg, gRPC / protobuf, StoreKit 2, OAuth, Firebase, tvOS, Redux, CI/CD, Xcode Cloud, Test Automation, XCTest

Carpix, BCA Expertise, iOS & Android

Native mobile applications for automotive insurance claim photo management with enterprise system integration.

Tech: Swift, RxSwift, MVVM + Coordinator, PhotoKit, Realm, ML Kit, Fabric, Firebase, Fastlane, Gitlab-CI, Kotlin, Android AAC, Android Jetpack, Fuel, Room, Koin, LiveData

Fashion Community, French Luxury Brand, iOS

Performance optimization and UX redesign of a social commerce application, cutting cold-start connection time by 90%.

Tech: Swift, RxSwift, MVVM + Coordinator, Auto Layout, URL Scheme

Mobile CI/CD Platform, IPPON Technologies, DevOps

Enterprise-grade on-premise continuous integration platform for mobile applications. Presented at Web2Day 2019.

Tech: Git, GitLab, GitLab-CI, Gitflow, Fastlane, Fabric, TestFlight, AppStore, Playstore

Metr, Personal Project, iOS

Automated business trip distance tracking application with intelligent motion detection.

Tech: SwiftUI, Combine, CoreData, CoreLocation, MapKit, Redux, Geofencing, Motion Activity, Local Notification

grpc-swift (open source contribution), Open Source (grpc/grpc-swift), Swift / Server

Merged contribution to grpc-swift, the official gRPC library for the Swift ecosystem.

Tech: Swift, gRPC, SwiftNIO, NIOSSL, TLS, Open Source

EDUCATION

Master of Science in Computer Science , Software Architecture specialization (ALMA program) 2012 - 2014

Faculty of Sciences, University of Nantes

Bachelor of Science in Computer Science 2011 - 2012

Faculty of Sciences, University of Nantes

DUT Computer Science 2008 - 2010

University Institute of Technology, Nantes

Scientific Baccalauréat , Physics-Chemistry specialization 2008

Henri Bergson High School, Angers

PUBLICATIONS & SPEAKING

Conference Presentations

- **Web2Day 2019** (June 2019): [Mobile CI: From Developer to App Store in Record Time](#)

Technical Publications

- **Nov 2018:** [RxSwift: How to make your favorite Delegate-based-APIs Reactive](#)
- **Jul 2018:** [Industrialization serving Mobile developments](#)
- **Aug 2017:** [RxSwift: How to bind a UITableView to a datasource](#)
- **Nov 2015:** [Cordova, Grunt, AngularJS: The Ionic stack for hybrid mobile development](#)
- **Nov 2014:** [Realm: Data persistence solution for iOS/Android applications](#)
