

FRANCK CLEMENT

SENIOR iOS DEVELOPER

438-794-6689

franck.clmnt@gmail.com

Montreal, QC, CANADA

<https://www.linkedin.com/in/franck-clmnt/>

PROFESSIONAL OVERVIEW

Senior iOS Developer with 10+ years of experience specializing in high-performance mobile applications for consumer entertainment platforms. Expertise in Swift, SwiftUI, AI integration, and advanced iOS frameworks serving millions of users.

Extensive background spanning both startup and enterprise environments, from early Swift adoption (2014) through modern iOS development with AI integration. Proven track record in mobile development, native solutions (iOS/tvOS), and scalable architecture design.

Recent achievements include architecting AI-powered conversational platforms, optimizing applications for 6M users with 99.9% crash-free rates, and managing 659 production releases across 5 major version cycles. Demonstrated expertise in performance engineering, privacy-compliant analytics, and enterprise-grade authentication systems.

Technical leadership experience in CI/CD automation, solution architecture, and attention to detail. Specialized in combining native iOS excellence with cutting-edge technologies including AI integration, real-time communication, and advanced media processing.

TECHNICAL SKILLS

- 10+ years of iOS development working experience
- Swift, SwiftUI, Objective-C, Xcode, iOS SDK, tvOS
- AI Integration (OpenAI Realtime API), gRPC, FFmpeg, Combine Framework, Async/Await
- Clean Architecture, Architectural patterns (MVVM, Redux, Coordinator), Continuous integration (Xcode Cloud, GitHub Actions)
- StoreKit 2, OAuth, Firebase Analytics, Crashlytics, Core Data, Realm, URLSession
- Performance Optimization, Memory Management, Privacy-Compliant Analytics, GDPR Compliance
- Management, Communication, Agile methods, CI/CD, Fastlane, Git
- Bilingual: English and French (native)

WORK EXPERIENCE

Senior iOS Developer

UGROUPMEDIA – PortableNorthPole, Montreal | 2020 – Present

- Led complete iOS ecosystem development for **PortableNorthPole**, managing 659 production releases across 5 major version cycles (v7.0.5 → v11.7.0)
- Architected and implemented **AI-powered conversational platforms** serving 6M users with real-time audio generation and multi-turn context management
- Real-time app behavior analysis with Firebase (Crashlytics) to maintain best user experience (**4.8 rated app, 99.9% crash-free rates**)
- Engineered enterprise-grade subscription platform with multi-provider OAuth, passwordless authentication, and automatic purchase restoration using **StoreKit 2**
- Implemented advanced media processing using **FFmpeg** for audio/video optimization, streaming, and real-time playback across iOS/tvOS platforms
- Delivered privacy-compliant analytics architecture with intelligent data masking, **GDPR compliance**, and comprehensive user behavior tracking
- Maintaining connection and communication between Backend and App via protobuf generated classes using **gRPC protocol**
- Established mature **CI/CD pipeline with Xcode Cloud** for automated release management and zero-downtime deployments
- Collaborating with designers to implement UI/UX components compliant with Apple Human Interface Guidelines, ensuring consistent user experiences
- Continuous follow-up on the newest iOS releases and features, early Swift adoption since 2014

Senior Mobile Development Engineer

IPPON Technologies, France | 2014 – 2019

- Designed, developed, and maintained mobile applications for diverse client portfolio ranging from showcase apps to complex social platforms
- Led full-cycle mobile development including architecture design, implementation, testing, and deployment
- Established mobile continuous integration platform ensuring code quality and automated deliverables
- Performance optimization of social commerce application achieving **90% connection time improvement** for French luxury brand
- Complete navigation architecture overhaul from burger menu to tab-based interface with modern UI/UX patterns
- Cross-platform development expertise (iOS/Android) and hybrid applications (Ionic, Cordova)
- Contributed to business development through technical proposal preparation and client presentations
- Mentored development teams and provided technical leadership across multiple concurrent projects

EDUCATION

Master of Science in Computer Science

Software Architecture Specialization (ALMA Program)

Faculty of Sciences, University of Nantes

Master's Level | 2012 – 2014

Bachelor of Science in Computer Science

Faculty of Sciences, University of Nantes

Bachelor's Level | 2011 – 2012

PUBLICATIONS & SPEAKING

Conference Presentations

- **Web2Day 2019** (June 2019): Mobile CI: From Developer to App Store in Record Time

Technical Publications

- **Nov 2018**: RxSwift: How to make your favorite Delegate-based-APIs Reactive
- **Jul 2018**: Industrialization serving Mobile developments
- **Aug 2017**: RxSwift: How to bind a UITableView to a datasource
- **Nov 2015**: Cordova, Grunt, AngularJS: The Ionic stack for hybrid mobile development
- **Nov 2014**: Realm: Data persistence solution for iOS/Android applications
